***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art does not disclose an apparatus for retrieving an unmanned aircraft wherein the apparatus includes a support element in combination with a flexible recovery means, a hoisting means coupled to the recovery means and able to retract it after capture of the aircraft, and a trigger element coupled between the recovery and hoisting means to retract the recovery means when a tension is applied to the recovery means at an intercept portion. The prior art discloses horizontally and vertically oriented flexible strands and barricades designed to capture incoming aircraft, both manned and unmanned; oftentimes the horizontally-oriented barricades are retracted following engagement with an aircraft. Also known in the prior art are cranes or hoists employing vertically suspended lifting cables. None of these various prior art references was found in combination with a triggering mechanism designed to retract the recovery element when tension was applied to it, nor was a reasonable combination of references suggested by the prior art.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
